

Aged Care Window & Door Solutions

This presentation provides information and support for architects and designers interested in specifying aged care window and door solutions. It seeks to answer the following questions:

- Is New Zealand's housing for the elderly adequate for an aging population?
- What are the special features relative to windows and doors that are priorities in designing for the elderly?
- What are the right products and the right detailing?
- Why are door thresholds and ventilation options a key consideration?
- What are the key findings in the APL: Massey University Aged Care Facilities research project?

Presentation contents: Trends in our ageing population

- ▶ Lifemark standards & star ratings
- ▶ Lifetime design principles
- ▶ Navigating door thresholds
- ▶ APL/Massey University Aged Care Facilities Research
- ▶ Time duration of elderly negotiating different thresholds
- ▶ Flush & non-flush door frames
- ▶ Detailing for sliding and hinged doors
- ▶ User-friendly hardware for the elderly
- ▶ The importance of ventilation
- ▶ Ventilation options
- ▶ Trickle ventilation: Sashvent, Aerovent & Ventient
- ▶ Thermally efficient windows & doors
- ▶ What Lifemark says about windows
- ▶ Lifemark certification
- ▶ Case Studies: Ranfurly (Auckland), Summerset on Cavendish (Christchurch), Malvina Major (Wellington)
- ▶ APL Assist
- ▶ Pre-tender detailing, shop drawings, specification support
- ▶ APL diversified production & technical infrastructure
- ▶ Research & development

This presentation is...

- CPD-accredited
- Available as face-to-face group offerings or via online live video
- Available in 30-minute and 60-minute sessions
